Summary

B.Tech graduate specializing in Data Science with hands-on experience in web development and data analysis. Comfortable working with React, JavaScript, Python, SQL, and data processing workflows. Built full-stack features, dashboards, and data-driven applications during internships. Enjoy solving problems, organizing data, and creating clean user experiences.

Skills

Programming: C, C++, Python, JavaScript, SQL

Web Development: HTML, CSS, React, Node.js, Express.js

Data Skills: Data Mining, Data Analysis, Data Engineering, Visualization

Techniques: Data Cleaning, Exploratory Data Analysis (EDA), Descriptive Statistics

Tools: Pandas, NumPy, Matplotlib, BeautifulSoup, MongoDB

Education

B.Tech. CSE (Data Science)

2021 - 2025

St. Vincent Pallotti College of Engineering and Technology, Nagpur

CGPA: 8.29 / 10

Higher Secondary (12th)

2021

Prerna Junior College, Nagpur

Percentage: 95.33%

Experience

Web Development Intern (MERN Stack)

Dec 2024 - May 2025

Yash Industries — Nagpur

React, Node.js, MongoDB

- Developed around 6 - 8 frontend pages for Student, HR, and Admin modules, improving navigation flow.
- Built job-application workflows used by over 150 students to view job posts and track interview updates.
- Created HR features for adding job openings and eligibility criteria, reducing setup effort by nearly 10–15%.
- Optimized admin workflows such as user verification and approval handling, improving response time by about 10%.
- Added dashboards and implemented semi-automated test-link generation to ease HR workload by roughly 20%.

Trainee Web Developer

Jun 2024 - Dec 2024

Advance Infotech — Nagpur

HTML, CSS, JavaScript

- Created responsive UI layouts, resulting in a 20% improvement in mobile usability scores.
- Optimized front-end code and reduced page load time by 15%.
- Performed testing across 10+ devices and browsers to ensure full compatibility.

Data Analytics & Science Intern

Feb 2024 - Apr 2024

Clustor Computing — Nagpur

Python, Pandas, NumPy, Matplotlib

- Analyzed large datasets using data mining and preprocessing techniques.
- Built small data pipelines to improve data flow and storage structure.
- Designed visualizations to support insights and reporting.

Projects

Product Review Scraping for Purchase Insights | *BeautifulSoup, Pandas*

Jul 2024 - Dec 2024

- Scraped product details, pricing, and reviews from e-commerce websites.
- Cleaned and structured the collected data to highlight trends and user sentiment.
- Stored processed data in a database and created visual summaries for insights.

Food Calorie Detection & Diet Recommendation System | *PHP, XAMPP*

Feb 2024 - May 2024

- Built frontend modules for calorie calculation and personalized diet guidance.
- Designed clean interfaces for tracking food intake and receiving tailored suggestions.
- Added logic to generate recommended diet plans based on user inputs.

Certifications

- **Cisco - Python Essentials (2025)**: Built a strong base in Python with hands-on practice in data structures, functions, error handling, and scripting fundamentals.
- **NPTEL - Data Analysis and Decision Making - 1 (2024)**: Completed a 12-week course, gaining analytical and decision-support skills.
- **NPTEL - Cloud Computing (2024)**: Completed a 12-week course, learning cloud fundamentals and virtualization concepts.

Activities

- Team Member, **DataDive 2.0** - WebCipher (Department Event)
