BRIEF SUMMARY

Bachelor of Technology in Computer Science and Engineering with specialization in Data Science. Expertise in Frontend Development, Mobile App Development, and React Js. Proficient in Python and SQL for web development, delivering high quality solutions through continuous learning of emerging technologies.

KEY EXPERTISE

- C and C++ programming
- HTML and CSS
- Data Analysis Techniques
- Front-end Frameworks Expertise
- Python Development
- SQL Database Management
- Javascript Programming

EDUCATION

St. Vincent Palloti College of Engineering and Technology

B.Tech. - CSE - Data Science

CGPA: 8.29 / 10

2021 – 2025 | Nagpur

Perna Junior College of Commerce, Science & Arts,

Nagpur

12th MSBSHSE

Percentage: 95.33 / 100

2021 | Nagpur

Pandit Bachharaj Vyas Vidyalaya and Junior College,

Nagpur

10th MSBSHSE

Percentage: 86.80 / 100

2019 | Nagpur

INTERNSHIPS

Web Development (MERN Stack) Intern

12/2024 – 05/2025 | Nagpur

Yash Industries

- Developed **CareerConnect** platform with three integrated modules: Student, HR, and Admin.
- Enabled students to access approved job postings, apply for positions, and receive interview notifications.
- Facilitated HR users in posting job openings with detailed descriptions and eligibility criteria.
- Streamlined routing of job postings to Admin for review and approval process.
- Managed user privileges and verified accounts within Admin module.
- Generated test links for assessments and maintained dashboards for key metrics monitoring.
- Enhanced overall system control through Admin functionalities.

Trainee Web Developer

15/06/2024 – 15/12/2024 | Nagpur

Advance Infotech

- Developed responsive web designs using HTML, CSS, and JavaScript frameworks to ensure seamless user experiences.
- Conducted website testing to ensure functionality across various devices and browsers.

Data Analytics & Science Intern

01/02/2024 – 08/04/2024 | Nagpur

Clustor Computing

- Executed data mining techniques to extract valuable insights from large datasets.
- Developed robust data engineering solutions to optimize data flow and storage.
- Processed complex datasets efficiently, ensuring accuracy and reliability.
- Designed informative data visualizations to facilitate comprehension of analytical results.

PROJECTS

Product Review Scraping for Purchase Decision Insights

29/07/2024 – 07/12/2024

Team Size: 4

Key Skills: Python Web Scraping Databases Front-End Web Development Data Analysis Data Visualization

Developed a Web Scraping and Data Analysis System to extract product details, pricing, and reviews from e-commerce platforms using Python and BeautifulSoup. Processed and cleaned data with Pandas, stored it in database, and visualized trends using Matplotlib.

Food Calorie Detection and Diet Recommendation

24/02/2024 – 15/05/2024

Team Size: 4

In 6th semester, I participated in the development of a Diet Recommendation System using XAMPP, Visual Studio, and PHP. This project was designed to assist users in monitoring their calorie intake and providing tailored diet suggestions. As a member of a four- person team, I played a key role in developing the frontend, which featured a calorie consumption calculator and a diet recommendation module.

Shopping Mart

09/02/2023 – 12/04/2023

Team Size: 2

During th semester, I collaborated on the development of a Shopping Mart application. This project included distinct login panels for both users and administrators, and featured an intuitive user interface that facilitated item collection in carts and bill generation. As part of a two-member team, I concentrated on ensuring a smooth and efficient shopping experience for users.
